## Company Profile

 GYPTech

 gypotech\_sa

 gypotech Saudi Arabia

 info@gypotech.com.sa

GYPTECH is a leading supplier of high-quality building materials that are widely used in the construction industry. The company offers a wide range of architectural materials, including ceramics, acoustical ceiling tiles, gypsum ceiling systems, gypsum boards, and their accessories, flooring, and suspended ceiling tiles. These materials are carefully selected to ensure that they meet the highest standards of quality and durability. In addition to these products, GYPTECH also represents over 9 renowned German brands in the architectural community. This allows the company to offer a wider range of products to its customers, ensuring that they have access to the latest and most innovative building materials.

# Products overview

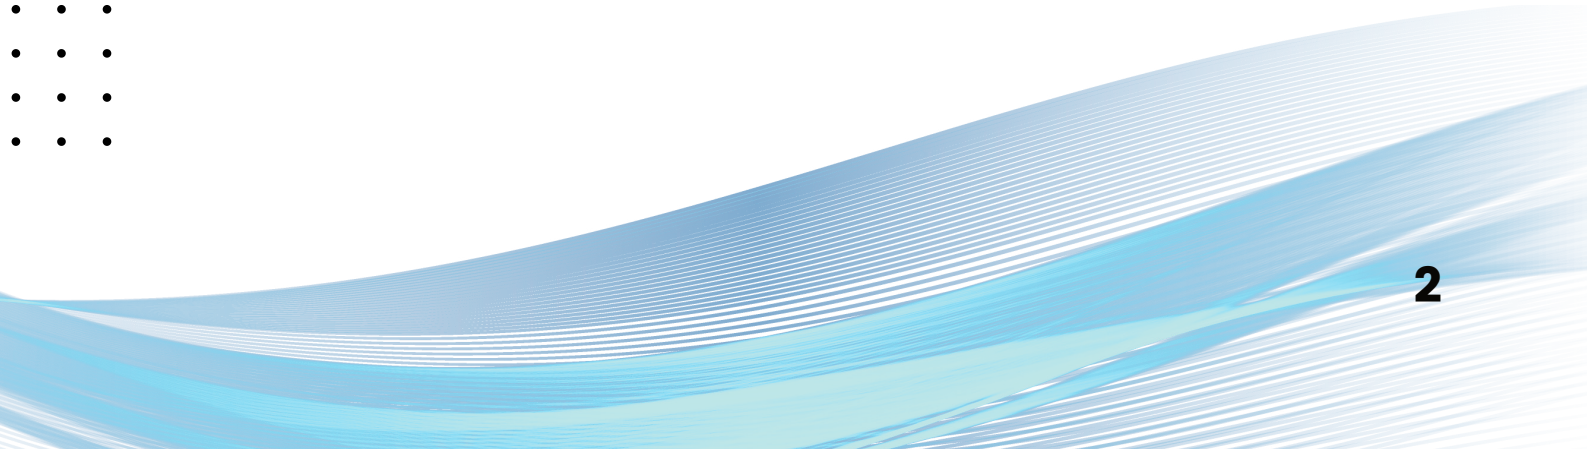

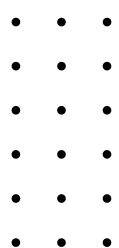

# About the Company

As an employee-focused company, we're able to direct our attention towards our customers, providing them with quick and excellent service. At GYPTECH, Building Technology Co. Ltd, our focus lies in being a customer-oriented building material supplier and manufacturer. With 28 years of experience in the industry, our business encompasses both retail and corporate sales divisions, catering to the evolving needs of the market.

We take pride in our reputation, constantly striving to maintain our competitive edge through the sale of a vast range of building materials. Our greatest strength, however, lies in our ability to provide exceptional service and the quickest delivery times possible.

As innovators within the industry, we offer creative building solutions such as hygienic lab countertops and acoustical wall panels that promote noise reduction in educational institutions and auditoriums. To complement our existing items, we are also proud to offer bridge bearings and expansion joints

# Our Team

# WHY GYPTECH?

GYPTECH, a prominent manufacturer of architectural materials, was formed in 1990. We've grown from a single showroom with four employees to a network of showrooms, production facilities, warehousing units, and a dedicated sales team.

## Process Oriented

GYPTECH takes pleasure in our process-oriented approach to all we do, including manufacturing and product delivery. This guarantees that every order is efficiently handled, made, and delivered, allowing us to keep our costs reasonable for our consumers.

## Trained Staff

Our employees and labor are subjected to frequent training and exams to ensure that they are up to date on the newest industry advancements and can communicate effectively and deliver high-quality work.

## Competitive Price

Concentrating on systems allows us to keep our overhead low, allowing us to sell high-quality items at a low price.

# Employee Focused

Our secret in providing an excellent and quick service to our customer is that we're an employee focused company. Our employees enjoy great benefits working for us and we believe happy employees means HAPPY CUSTOMERS.

*Our team comprises of variety of experience. This enables us to tackle projects more effectively.*

## Support

With offices and showrooms spread throughout the kingdom, we provide complete support for all of our goods.

## Fast Service

We can deliver quick service without sacrificing quality because of GYPTECH's efficient technologies and streamlined systems.

## Certification

We are happy to have received Aramco approval and certification from top labs attesting to the dependability and quality of our goods as evidence of our dedication to quality and performance.

# Architectural fit-out solution

An architectural fit-out solution is a comprehensive approach to designing and constructing the interior of a space with a focus on functionality, aesthetics, and environmental considerations, as well as project budget and schedule.

## KEY ELEMENTS

### Design

This phase involves developing a plan that meets the client's requirements, including determining the layout, furniture and fixtures, and finishes.

### Construction

This phase brings the design to life through demolition, installation of new walls, floors, ceilings, fixtures, and the final touches.

### Project Management

The project manager oversees the entire fit-out process, ensuring adherence to budget, schedule, and customer satisfaction.

*Architectural fit-out solutions can be tailored for various spaces such as offices, retail stores, restaurants, and healthcare facilities, providing customized functionality and aesthetic appeal.*

# Ceiling Solution

## Baffle Ceiling

A baffle ceiling is a suspended panel oriented perpendicular to the ceiling to optimize sound absorption. This smart system allows for excellent sound absorption and adding depth to the design. It comes with in 63 colors and provides 1.20 noise reduction coefficient rating

### Australian Design

Baffles are manufactured in Saudi Arabia but designed and tested in Australia. Our partners at Sontext manufacturing baffles since 1982 allowed us to produce this highly technical item at affordable price

### Flexibility

Baffle panels can be aligned in different ways, wavy or straight. Furthermore, they can be produced using fabric or wood texture to give a more classical feeling. Baffles can be arranged in a variety of patterns, including linear, staggered, and curved.

### Acoustical Report

Baffle ceiling systems are tested at the site for sound absorption. This is done by our consultant from Australia to confirm that the baffles are providing with excellent sound absorption in accordance with the specs provided

### Tested

Panels are tested against fire, chemicals, moisture and allergens. This deems that our baffles are safe to use in public places specially schools. They're considered as safer and more cost effective alternative to more expensive methods for sound absorption.

### Perforated and Fabric Wrapped

Type of suspended ceiling system that consists of wooden or metal baffles arranged in a parallel or perpendicular pattern. These tiles are designed to reduce noise and control the acoustics of a room. They work by absorbing sound waves that bounce off of hard surfaces such as walls and floors, which results in better sound quality and a more comfortable environment. Baffle ceiling tiles are commonly used in commercial and public spaces such as offices, conference rooms, schools, and airports.

### Other ceiling solutions:

- Metal Ceiling
- Moisture Resistant Ceiling
- Mineral Fiber Ceiling
- Gypsum Ceilings
- Cloud Ceiling

Sizes:

- 60x60 Ceiling Tiles
- 60x120 Ceiling Tiles
- 120x120 Ceiling tiles

# Acoustic Treatment Solution

## Acoustic Wall Panel

### Features Overview

Acoustical wall panels achieve two goals: reducing the room's echoing and decorative purposes. Our acoustical wall panels comes in many variations and many textures, many colors. They're usually used in crowded places where the clarity of sound is important such as restaurants, meeting rooms, class rooms, lecture halls, open offices, hotel lobbies, cafe

### Sound Reduction

Our acoustical wall panels comes in many shapes and form, their main features is:

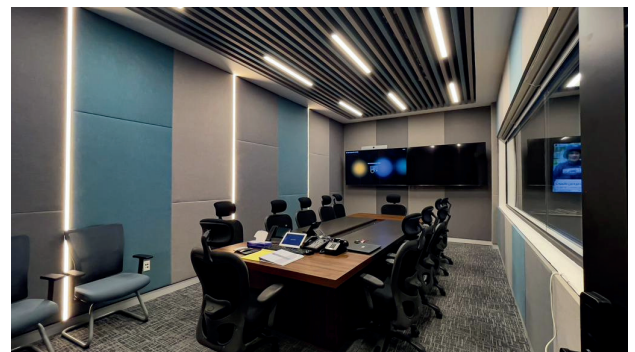

- Ability to reduce sound levels by 50% to 80% depending on the room and requirement.
- Ability to maximize clarity of the voice. This is done by absorbing unwanted sound frequencies.
- Strips away unwanted sound reflections that causes background chatter and clatter.
- Absorbs the sound of footsteps, AC, humming of PC's.

### Design Options

Our acoustical wall system advantages that it doesn't only provide cost effective solution to reduce the sound pollution and the echo problems, but it does so in an elegant way. It comes in many design options, colors, color combinations, depth, suspended or non-suspended and textures.
